## Profile

I am a technology enthusiast, dedicated to acquiring knowledge and staying updated to continuously strengthen and expand my skills. With over a year of experience in leading and supporting front-end development teams, I have had the valuable opportunity to grow both professionally and personally.

My constant motivation lies in facing new challenges and seeking innovative solutions to the problems that arise in the field of technology. My proactive approach and ability to think creatively have enabled me to effectively tackle technical challenges and find practical solutions that drive project success.

## Employment

### Front-end developer

Sep 2021 - Jul 2023

Inlaze, Pereira

As a responsible individual for providing support to the company's current projects and developing new projects from design to implementation, I apply best practices and analysis to ensure their proper functioning.

My role includes overseeing and controlling changes, ensuring code quality, and maintaining the appropriate structure for different projects according to their requirements.

Additionally, I am responsible for creating the frameworks for new projects. I also provide support to front-end developers in project implementation, resolving conflicts, troubleshooting errors, and offering knowledge on specific features.

## Certificates

### Professional software developer technician

Dec 2019

During my university education, I gained extensive experience in a variety of tools and programming languages. I primarily focused on Java and PHP, specializing in backend development. Additionally, I developed strong skills in SQL for database management, and mastered HTML, CSS, and JavaScript for frontend development.

### Professional mobile development technician

Dec 2019

During my university education, I acquired skills in mobile development using tools like Android Studio. I learned to implement native device functionalities, manage resources tailored to different versions of the operating system, and used Java as the primary language for application development.

### Software development engineer
